

Abstract

Stepanets I.A. Design and modeling of energy and ecological efficient heating circuit of Sumy. - Manuscript.

The thesis for the degree of Master of specialty 8.05060105 - energy management. - National Technical University of Ukraine "Kyiv Polytechnic Institute", Kyiv, 2016

In this paper, the combined thermal and hydraulic simulation modes district heating system in case of thermal CH-7 in Sumy. The proposed scheme of energy efficient heating and DHW software needs.

Keywords: central heating system, central heating unit, individual tempo point model, combined simulation, Thermal and hydraulic performance.
